ELBRIDGE W. FOX, For Finance Committee.

ANNUAL REPORT

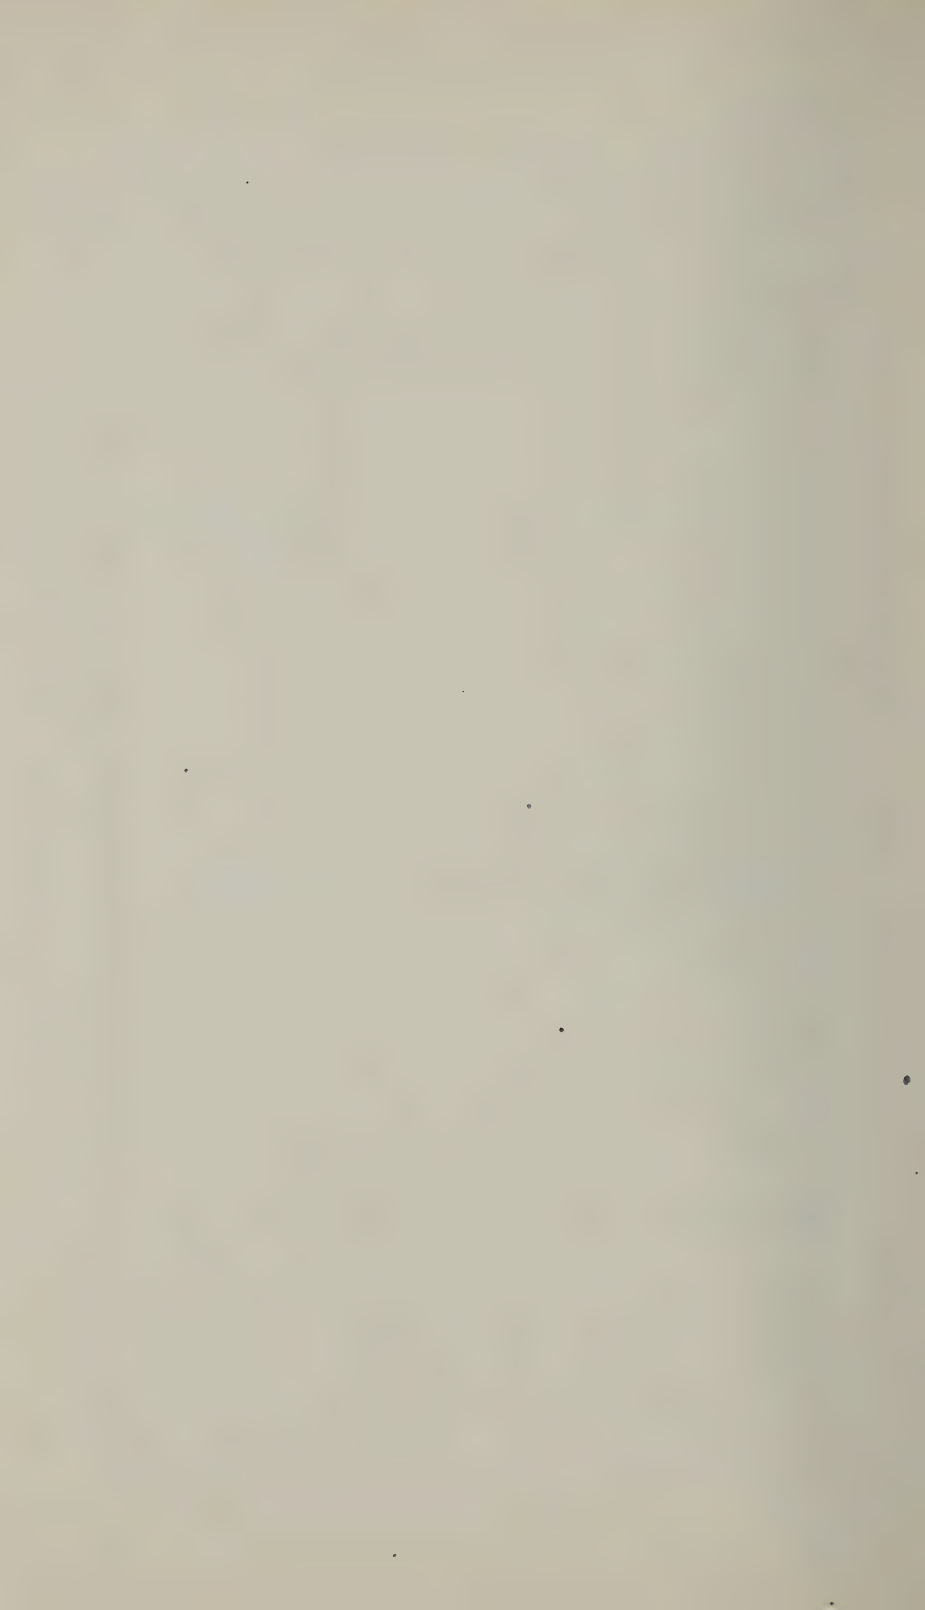

OF THE

SCHOOL BOARD OF MILTON,

FOR THE

YEAR ENDING MARCH 1st, 1900,

REPORT.

Your school board would submit the following remarks in addition to the tabular report :

There have been thirty weeks school in every district during the past year except at South Milton, where, on account of the illness of the teacher, the school closed at the end of 28 weeks.

This is two or three weeks more school than in recent years, and has extended the winter term till the 1st of February. We think that all who keep acquainted with school work are agreed that these added weeks in winter, especially in the villages, are the most favorable for study and the most profitable of the school year.

With the exception of Milton Mills district, there have been practically no changes in teachers from the preceding year. Where teacher and pupils work together satisfactorily, there are many gains in such continued service. As a whole we believe the teachers have been faithful, and the pupils made good progress.

In some of the schools there is marked increase in the number of visitors—parents and friends. This is appreciated by the teachers and gives inspiration to the pupils. It would be well if frequent visits should be made to observe the regular school work, as well as on exhibition days.

In accordance with the recommendation at the last school meeting the schoolhouse in the Highland district was repaired, and at the request of the parents, school has been maintained

in it through the year. This has made unnecessary any transportation of pupils to the Milton Mills school, and also that only two schools were required in Milton Mills village. There have been as many as fourteen pupils in the Highland district school.

The schools with the fewest pupils are on the West Milton side. If some arrangement, satisfactory to the parents and property owners, could be made whereby the four districts could be consolidated into one, or at most two schools, it would be a saving of expense and add efficiency to the schools.

It has been the practice to furnish a teacher at Milton Mills capable of giving instruction in studies above the Grammar grade. This partial high school course has been allowed as a right to this part of the town owing to its distance from the Nute High School, but your committee would suggest for consideration, if it would not be economy for the town to transport all high school pupils in the Milton Mills district to the Nute High School where the advantages are much greater than any local high school can be. It is believed the saving of expense in the teacher in the Mills school would pay the expense of transporting the pupils. The Nute school would be benefited by the added pupils, and most important of all the pupils would receive the increased advantages of the better equipped institution. Twenty-four different pupils have attended the Nute High School during the past year from our own town. It is believed the school is doing most satisfactory work, and probably there are few high schools in the state that afford as thorough instruction. It should be the ambition of every parent as well as all the youth in town to make the most of such rare advantages.

The income of the Nute common school fund has been less than usual by some seventy-five dollars, and there has been a falling off in some other sources of school revenues, so that with the five hundred dollars additional appropriation, there has been but little more than one hundred dollars additional money. Some expenses not anticipated have had to be met, the most

considerable being the repairs of the Highland district school-house. Your school board has endeavored to expend the monies with as much economy as is consistent with the best possible educational results.

Respectfully submitted,

ANNIE E. COOK,
MYRON P. DICKEY.
FORREST L. MARSH.
